FERTILITY IN DAIRY HERDS

Save this resource on your desktop for future reference and share with interested colleagues and farmers. Click here to view the full A-Z list of resources.

The basics of reproduction

Reproduction management does not just involve the milking cow, it starts from the day a heifer is born.....

Heat Detection

Poor heat detection has a huge impact on overall herd reproductive performance....

Treating the Normal Cow - Missed Heats and Synchronisation

No matter how good the heat detection strategy employed there will always be cows that are.....

Identifying and Treating the Abnormally Cycling Cows

Identification and treatment of cows that do not have normally functioning ovaries can significantly improve fertility....

Pregnancy Diagnosis

Efficient livestock production requires accurate, early pregnancy detection.....

Dealing with Abortion

The basis of all abortion prevention programmes is sound herd health management.....

Uterine Infection

Infection of the reproductive tract after calving is one of the most important causes of infertility in the cow.....

Measuring fertility - Benchmarking your farm

Poor fertility costs money....

Webinar Identifying and treating the abnormally cycling cow

This webinar discusses how anoestrus, ovarian cysts and delayed ovulation significantly affect fertility.

Webinar Targets and Benchmarking

This webinar discusses how big an issue is poor fertility.

Webinar Oestrus Detection in Cattle

Oestrus detection - inseminating more cows at the right time is discussed in this webinar.

IMPROVING CATTLE HEALTH

'PREVENTION IS BETTER THAN CURE'

Plan for health with your vet – get a veterinary health plan
