SETTING VETERINARY STANDARDS

### PARASITE FORECAST DECEMBER 2017

NADIS publishes a monthly Parasite Forecast for farmers and livestock keepers, based on detailed Met Office data. The Parasite Forecast outlines the parasitic challenges facing cattle and sheep in the different UK regions.

#### PARASITE FORECAST

In the December issue plan this season's control strategy

- Liver fluke warning
- Chronic fluke disease in sheep and cattle
- Sheep Scab
- Sheep and cattle lice

#### WEBINAR

Watch the webinar for the December Parasite Forecast

**Liver fluke control in cattle:**  
Infection is more commonly encountered in beef cows grazing poor wet pasture....

**Consider targeted parasite control** throughout grazing season....

**Don't ignore** the threat of lungworm....

**Prepare for sheep** parasite control in the season ahead...

**Nematodirosis in Sheep**  
A parasitic infection which causes profuse scour in lamb grazed on pasture in consecutive years....

### RELATED PARASITE DISEASES

#### PGE and lungworm in cattle

Present on many farms and can cause respiratory distress and coughing in young or previously unexposed cattle....

#### Gastrointestinal Nematode Infestations in Sheep

Perhaps the most important group of conditions limiting intensive sheep enterprises....

#### Liver fluke control in sheep:

Liver fluke infestation (fasciolosis) has always been a problem during the late autumn and winter in the wetter western areas of the UK.....
